TEXT

Général

- 1 Dereumeaux C, Saoudi A, Pecheux M. *et al.* (2016) : Biomarkers of exposure to environmental contaminants in French pregnant women from the ELFE cohort in 2011. *Environ Intern*, 97, 56-67.
- 2 Gong Y, Palmer S, Gallacher J. *et al.* (2016) : A systematic review of the relationship between objective measurements of the urban environment and psychological distress. *Environ Intern*, 96, 48-57.
- 3 Lake IR, Jones NR, Agnew M. *et al.* (2017) : Climatic change and future pollen allergy in Europe. *Environ Health Perspect*, 125, 385-391.
- 4 Petri AK, Schmiedchen K, Stunder D. *et al.* (2017) : Biological effects of exposure to static electric fields in humans and vertebrates: a systematic review. *Environ Health*, 16, 41.
- 5 Sattler C, Moritz F, Chen S. *et al.* (2017) : Nanoparticle exposure reactivates latent herpesvirus and restores a signature of acute affection. *Particle Fibre Toxicol*, 14, 2.

Sources extérieures

- 6 Arhami M, Hosseini V, Zare Shahne M *et al.* (2017) : Seasonal trends, chemical speciation and source apportionment of fine PM in Tehran. *Atmos Environ*, 153, 70-82.

- 7 Corella JP, Valero-Garcès BL, Wang F *et al.* (2017). 700 years reconstruction of mercury and lead atmospheric deposition in the Pyrenees (NE Spain). *Atmos Environ*, 155, 97-107.
- 8 Durdina L, Brem BT, Setyan A *et al.* (2017) : Assessment of Particle Pollution from Jetliners: from Smoke Visibility to Nanoparticle Counting. *Environ Sci Technol*, 51(6), 3534-3541.
- 9 Gentner DR, Jathar SH, Gordon TD *et al.* (2017) : Review of Urban Secondary Organic Aerosol Formation from Gasoline and Diesel Motor Vehicle Emissions. *Environ Sci Technol*, 51(3), 1074-1093.
- 10 Shirmohammadi F, Sowlat MH, Hasheminassab S *et al.* (2017) : Emission rates of particle number, mass and black carbon by the Los Angeles International Airport (LAX) and its impact on air quality in Los Angeles. *Atmos Environ*, 151, 82-93.
- 11 Sylvestre A, Mizzi A, Mathiot S *et al.* (2017). Comprehensive chemical characterization of industrial PM_{2.5} from steel industry activities. *Atmos Environ*, 152, 180-190.
- 12 Yue T, Yue X, Chai F *et al.* (2017) : Characteristics of volatile organic compounds (VOCs) from the evaporative emissions of modern passenger cars *Atmos Environ*, 151, 62-69.

Qualité de l'air intérieur

- 13 Butler DA, Madhavan G. (2017) : Communicating the health effects of indoor exposure to particulate matter. *Indoor Air*, 27(3), 503-505.
- 14 Höllbacher E, Ters T, Rieder-Gradinger C, Srebotnik E. (2017) : Emissions of indoor air pollutants from six user scenarios in a model room. *Atmos Environ*, 150, 389-394.
- 15 Mendell MJ, Kumagai K. (2017) : Observation-based metrics for residential dampness and mold with dose-response relationship to health: a review. *Indoor Air*, 27(3), 506-517.
- 16 Mensah-Attipoe J, Taübel M, Hernandez M *et al.* (2017) : An emerging paradox: toward a better understanding of the potential benefits and adversity of microbe exposures in the indoor environment. *Indoor Air*, 27(1), 3-5.

- 17 Moreno T, Kelly FJ, Dunster C *et al.* (2017) : Oxidative potential of subway PM_{2.5}. *Atmos Environ*, 148, 230-238.
- 18 Poulin P, Levasseur ME, Huppé V (2016) : Mesures d'adaptation pour une saine qualité de l'air intérieur dans un contexte de changements climatiques : revue de la littérature. Institut national de Santé Publique du Québec, Direction de la Santé Environnementale et de la Toxicologie, septembre.
- 19 Raffy G, Mercier F, Blanchard O *et al.* (2017) : Semi-volatile organic compounds in the air and dust of 30 French schools: a pilot study. *Indoor Air*, 27(1), 114-127.
- 20 Triadó-Margarit X, Veillette M, Duchaine C *et al.* (2017) : Bioaerosols in the Barcelona subway system. *Indoor Air*, 27(3), 564-575.
- 21 Van Ryswyk K, Anastasopoulos AT, Evans G *et al.* (2017) : Metro Commuter Exposures to Particulate Air Pollution and PM_{2.5}-Associated Elements in Three Canadian Cities: The Urban Transportation Exposure Study. *Environ Sci Technol*, 51(10), 5713-5720.
- 22 Wolkoff P (2017) : External eye symptoms in indoor environments. *Indoor Air*, 27(2), 246-260.
- 23 Ye W, Gao J, Zhang X, Yu WC, (2017) : Studies of relationships between ventilation, pollution exposure and environmental health in buildings. *Indoor Built Environ*, 28 (2), 147-151.
- 24 Yu C, Lee Y. (2017) : Housing requirements for an ageing society. *Indoor Built Environ*, 28(4), 441-446.

Immissions- expositions

- 25 Dons E, Laeremans M, Oriuela JP *et al.* (2017) : Wearable Sensors for Personal Monitoring and Estimation of Inhaled Traffic-Related Air Pollution: Evaluation of Methods. *Environ Sci Technol*, 51(3), 1859-1867.
- 26 Jedynska A, Hoek G, Wang M *et al.* (2017) : Spatial variations and development of land use regression models of oxidative potential in ten European study areas *Atmos Environ*, 150, 24-32.

- 27 Jeong CH, Traub A, Evans GJ. (2017) : Exposure to ultrafine particles and black carbon in diesel-powered commuter trains. *Atmos Environ*,155, 46-52.
- 28 Jeong H, Park D. (2017) : Characteristics of elementary school children's daily exposure to black carbon (BC) in Korea. *Atmos Environ*,154, 179-188.
- 29 Kirchstetter TW, Preble CV, Hadley OL et al. (2017) : Large reductions in urban black carbon concentrations in the United States between 1965 and 2000. *Atmos Environ*, 151, 17-23.
- 30 Lacressonnière G, Watson L, Gauss M et al. (2017) : Particulate matter air pollution in Europe in a +2 °C warming world. *Atmos Environ*,154, 129-140.
- 31 Nopmongcol U, Grant J, Knipping E et al. (2017) : Air Quality Impacts of Electrifying Vehicles and Equipment Across the United States.*Environ Sci Technol*,51(5), 2830-2837.
- 32 Okokon EO, Yli-Tuomi T, Turunen AW et al. (2017) : Particulates and noise exposure during bicycle, bus and car commuting: A study in three European cities. *Environ Res*,154, 181-189.
- 33 Petit JE, Amodeo T, Meleux F et al. (2017) : Characterising an intense PM pollution episode in March 2015 in France from multi-site approach and near real time data: Climatology, variabilities, geographical origins and model evaluation. *Atmos Environ*,155, 68-84.
- 34 Potera C. (2017) : Way to go: identifying routes for walkers and cyclists to avoid air pollutants. *Environ Health Perspect*, 125(4), A71.
- 35 Shirmohammadi F, Wang D, Hasheminassab S et al. (2017) : Oxidative potential of on-road fine particulate matter (PM_{2.5}) measured on major freeways of Los Angeles, CA, and a 10-year comparison with earlier roadside studies. *Atmos Environ*, 148, 102-114.
- 36 Van Nunen E, Vermeulen R, Tsai MY et al. (2017) : Land Use Regression Models for Ultrafine Particles in Six European Areas.*Environ Sci Technol*, 51(6), 3336-3345.

Santé

- 37 Anenberg SC, Miller J, Minjares R. *et al.* (2017) : Impacts and mitigation of excess diesel-related NOx emissions in 11 major vehicle markets. *Nature*, 545, 467-471.
- 38 Cohen AJ, Brauer M, Burnett R *et al.* (2017) : Estimates and 25-year trends of the global burden of disease attributable to ambient air pollution: an analysis of data from the Global Burden of Diseases Study 2015. *The Lancet*, 10082, 1907-1918.
- 39 Fuertes E, Standl M, Forns J *et al.* (2016) : Traffic-related air pollution and hyperactivity/inattention, dyslexia and dyscalculia in adolescents of the German GINIplus birth cohort. *Environ Intern*, 97, 85-92.
- 40 Han C, Lim YH, Jun GK, Hong YC. (2017) : Association between ambient particulate matter and disorders of vestibular function. *Environ Res*, 155, 242-248.
- 41 Jerrett M, Brook R, White LF *et al.* (2017) : Ambient ozone and incident diabetes: a prospective analysis in a large cohort of African American women. *Environ Intern*, 102, 42-47.
- 42 Lipfert FW. (2017) : A critical review of the ESCAPE project for estimating long-term health effects of air pollution. *Environ Intern*, 99, 87-96.
- 43 Malintyre HL, Heaviside C, Neal LS *et al.* (2016) : Mortality and emergency hospitalizations associated with atmospheric particulate matter episodes accross the UK in spring 2014. *Environ Intern*, 97, 108-116.
- 44 Malley CS, Heal MR, Braban CF *et al.* (2016) : The contribution to long-term health relevant particulate matter at the UK EMEP supersites between 2010 and 2013: quantifying the mitigation challenge. *Environ Intern*, 96, 98-111.
- 45 Pedersen M, Andersen ZJ, Stafoggia M *et al.* (2017) : Ambient air pollution and primary liver cancer incidence in four European cohorts within the ESCAPE project. *Environ Res*, 154, 226-233.
- 46 Pun VC, Manjourides J, Suh H. (2017) : Association of ambient air pollution with depressive and anxiety symptoms in older adults:

- results from the NSHAP study. *Environ Health Perspect*, 125 (3), 342-348.
- 47 Reinmuth-Selzle K, Kampf CJ, Lucas K *et al.* (2017) : Air Pollution and Climate Change Effects on Allergies in the Anthropocene: Abundance, Interaction, and Modification of Allergens and Adjuvants. *Environ Sci Technol*, 51(8), 4119–4141 (Critical review).
- 48 Ranciere F, Boucas N, Viola M, Momas I. (2017) : Early exposure to traffic-related air pollution, respiratory symptoms at 4 years of age and potential effect modification by parental allergy, stressful family events and sex: a prospective follow-up study of the Paris Birth Cohort. *Environ Health Perspect*, 125 (4), 7345.
- 49 Saenen ND, Provost EB, Vaene MK *et al.* (2016) : Recent versus chronic exposure to particulate matter air pollution in association with neurobehavioral performance in a panel of primary school children. *Environ Intern*, 96, 112-119.
- 50 Wang J, Xing J, Mathur R *et al.* (2017) : Historical trends in PM_{2,5} related premature mortality during 1990-2010 across the Northern Hemisphere. *Environ Health Perspect*, 125(3), 410-419.
- 51 Ye M, Beach J, Martin JW, Senthilselvan A. (2017) : Pesticide exposures and respiratory health in general populations. *J Environ Sci*, 51, 361-370 (review).
